UNITED STATES PATENT OFFICE.

MARY E. FITCH, OF BROOKLINE, MASSACHUSETTS.

DESIGN FOR A CROCHET-NEEDLE.

47,718.

Specification for Design.

Patented Aug. 17, 1915.

Application filed March 4, 1914. Serial No. 822,516. Term of patent 14 years.

To all whom it may concern:

Be it known that I, MARY E. FITCH, a citizen of the United States, residing at Brookline, in the county of Norfolk, State of Massachusetts, have invented a new, original, and ornamental Design for Crochet-Needles, of which the following is a specification, reference being had to the accompanying drawing, forming part thereof.

Figure 1 is a side elevation of a crochet needle showing my new design. Fig. 2 is a plan edge view thereof.

1 designates the handle of the device.

2 designates the needle proper, and 3 the barb of the latter.

The handle is composed of a body having on its sides the panels 4, the marginal lines

5, which form borders therefor. The body then curves from said borders to the edges of the body as at 6. The top and bottom edges of the handle are right-lined and parallel and the front and rear ends thereof are coincident curves in opposite directions.

The curved edges extend continuously unbroken around the top, bottom and ends of the body. The surfaces of the panels are flat unbroken to their borders.

I claim:—

The ornamental design for a crochet needle substantially as shown and described.

MARY E. FITCH.

Witnesses:

CHARLOTTE M. DOHERTY,
HENRY O. CUSHMAN.
